

Wickhambrook Primary Academy

Eco Club

There are probably many of us putting waste into our blue bins that we genuinely thought could be recycled.—it's a minefield.

Were you aware that crisp packets and biscuit wrappers cannot be recycled via blue bin collections? The packets contain a type of plastic that cannot currently be recycled in this way.

As a school we have teamed up/registered with **Terracycle**, a company that has many different recycling initiatives. We have registered with their crisp packet recycling, their biscuit wrapper recycling and their writing instruments(pens, felt tips, markers) schemes. They process this waste into pellets which are then made into usable items rather than incinerating or sending them to landfill. A brief summary of this can be seen in this clip

<https://www.facebook.com/TerraCycleUK/videos/2245682789000110/>

Any waste that we send in is weighed and we are credited accordingly. We plan to use the funds for future Eco School projects. Last academic year we raised just short of £90 and we feel we can do much better with your support.

Attached is a poster showing what items we can accept, as governed by the sponsors of the schemes.

Please can you help by sending in your waste, separated into biscuits/crisp/pens.

Thankyou for your support

Reuse, reduce, recycle
